```java
public void borrowBook(User user, Book book) throws
SecuritPolicyViolationException {

// call to the security service
        ServiceUtils.checkSecurity(user,
LibrarySecurityModel.BORROWBOOK\_METHOD,
LibrarySecurityModel.BOOK\_VIEW),
ContextManager.getTemporalContext());}

  // call to business objects
  // borrow the book for the user
book.execute(Book.BORROW, user);
  // call the dao class to update the database
bookDAO.insertBorrow(userDTO, bookDTO);}
```
