```java
public void borrowBook(User user, Book book) throws

SecuritPolicyViolationException {
// call to the security service

        ServiceUtils.checkSecurity(user,
LibrarySecurityModel.BORROWBOOK\_METHOD,
LibrarySecurityModel.BOOK\_VIEW);
ContextManager.getTemporalContext());}

    // call to business objects
    // borrow the book for the user
book.execute(Book.BORROW, user);

    // call the dao class to update the database
bookDAO.insertBorrow(userDTO, bookDTO);}
```
